## ***Let's Get Up and Go!***

Dear Friend,

Kenedi can't see. At home, she walks headfirst into walls causing bruises on her tiny body. Her Mom Andy, like all parents of blind children, worried about Kenedi's inability to safely walk to independently explore her world. Like Andy, all parents of blind babies worry they lack the tools their blind children need to walk independently with safety.

When Kenedi's Mom found the Safe Toddlers' Belt Cane website, she was immediately relieved. She knew this mobility tool was a right and necessary solution for Kenedi's independence. Safe Toddlers belt cane is a very new and very effective mobility tool for blind toddlers. When a toddler who is blind like Kenedi wears her belt cane, she no longer has bruises on her forehead, she runs safely onto playgrounds, and she walks independently in the store learning how her mom shops.

*This is Kenedi Watch her **Get Up and***

Kenedi's mom tells everyone, "Safe Toddlers Forever Changed our Lives."

Families submit applications for Safe Toddlers' belt canes for their children knowing that without them, their blind toddlers will continue to struggle to walk independently on time and with safety. Since we started providing belt canes at a reduced rate, we've received hundreds of applications from families reaching out for this helping hand. And unfortunately, there's been more families than we can currently help. (Click paragraph below or go to [www.safetoddles.org/teamsafety](http://www.safetoddles.org/teamsafety))

[That's why during this year's Let's Get Up and Go drive, we're asking folks like you to donate to help more families waiting for this kind of support. Make your donation this week to help kids waiting for their first Safe Toddlers Belt Cane and other essential support services.](#)

Safe Toddlers invented the Belt Cane, the *only* mobility tool for toddlers who are blind! The impact of its development has been on par with the invention of the wheelchair because of its immediate effectiveness and absolute necessity to its user. The Safe Toddlers Belt Cane provides life-changing outcomes of independent and safe mobility, a joy of exploring, and enhancing early childhood development for toddlers who are blind.

I am Dr. Grace Ambrose-Zaken, a certified orientation and mobility specialist and President/CEO of Safe Toddlers, Inc. I saw the difficulty blind children like Kenedi were having and decided to do something about it. I invented the Safe Toddlers' Belt Cane and brought it to market. This belt cane has already changed the lives of many toddlers who are blind. ***But there is so much more work to do. Team Safe Toddlers works tirelessly to reach every toddler whose life would forever be changed for the better if only the Safe Toddlers' Belt Cane was available to them. Thousands of toddlers remain unserved while we increase our ability to meet this unmet need. It is my goal to provide the Safe Toddlers' Belt Cane and necessary supports to ensure every toddler who is blind can walk independently and safely, and enhance their early childhood development, similarly to their sighted peers.***

Will you be a champion and support Safe Toddlers' efforts to improve children with disabilities' lives? Your donation will put a Safe Toddlers' Belt Cane on a toddler who is blind and change their life forever!

***Please Let's Get Up and Go together. Donate to Safe Toddlers so toddlers who are blind can Get Up and Go!***

Here's how your donation will make a difference in the life of toddlers who are blind:

A [monthly donation](#) of \$19 would ensure each year a child is provided a complete belt cane set.

A [one-time donation](#) of \$50 subsidizes the cost of Belt Cane materials

A [one-time donation](#) of \$100 provides a complete set of cane rods

A [one-time donation](#) of \$200 is the cost of a complete Belt Cane

**Larger donations can provide Safe Toddlers' belt canes to even more toddlers in need.** Your generous gift of any amount will forever contribute to enriching the life of a toddler who is blind— your gift will literally help them start traveling safely down the path of life!

**The Pediatric Belt Cane changed the life of both Kenedi and her mother. Andy has shared their journey on social media.** Kenedi started wearing her belt cane at age two, her first struggle was learning to stay with the group in a store. She is now four years old, a cheerleader, runs through the store in her favorite dressy shoes, and demonstrates how she goes down slides and swings in the swing set all while wearing her belt cane. (video link).

Help us help blind children like Kenedi to walk safely just as their sighted friends do by making your donation today. Safe Toddlers is a 501(c)(3) organization, your donation is tax deductible. Most of our funding comes from supporters like you. Your life-changing gift today will help put the world's only proven blind toddler mobility device in the hands of blind toddlers so they can travel safely and actively like children their age. Watching Andy's video will show you the impact your gift will have on the life of blind toddlers. To see more videos of Kenedi's, go to @GuidingKenedi on TikTok. Our social media is @SafeToddlers for videos of many children like Kenedi using their Safe Toddlers' Belt Canes too!

And thank you for helping make a difference in the lives of blind toddlers!

Sincerely,

**Donate**
